

# UpToDate®

At the moment, access to UpToDate Advanced is possible after registration (creation of an account with email, username and password) at the NMS facilities.

If you cannot come to NMS, the Library can register remotely at the same time as the user, and it is only necessary to send the following data to [biblioteca@nms.unl.pt](mailto:biblioteca@nms.unl.pt): email and username. Afterwards a code will be sent to the user's email which must be communicated (up to 10 minutes later) to the Library to be introduced in the system and finalize the activation of the user's account.
